Load Test Results & Analysis

Single-run Apache JMeter analysis · response times · throughput · errors · concurrency

Run overview

File: **load_1_user.csv** · Start: 2026-10-29 08:44:57 UTC · Last sample completion: 2026-10-29 08:45:02 UTC · Estimated duration: 4.72 seconds

Total samples	Avg response	P95 response	Overall through…	Error rate	Max active threads
50	94.0 …	203.…	10.6…	0.00%	1

*Throughput is estimated as completed samples divided by the timestamp-derived run span. It may differ from JMeter's official throughput because the CSV may not record exact test start/end boundaries.

Overview | Response Time | Throughput | Concurrency | Errors & Status | Transactions & Samples | Export

Transaction summary

transaction	samples	average_ms	median_ms	min_ms	max_ms	std_dev_ms	failures	success_rate_
